

ResQ

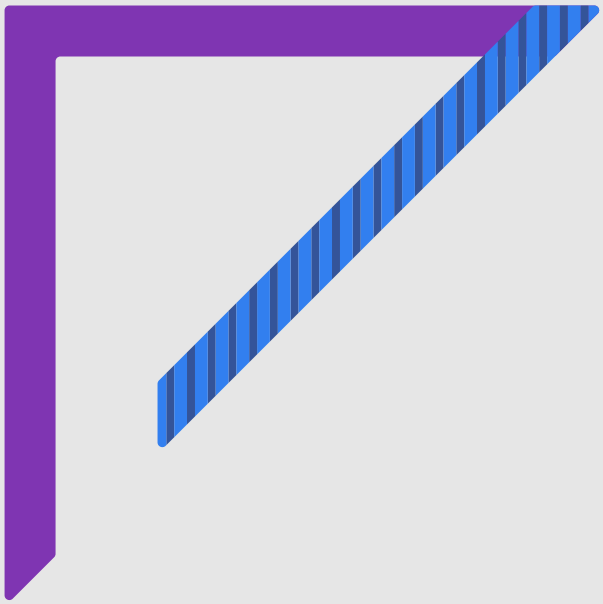

An integrated system combining powerful reserving and data management

ResQ

ResQ augments best practice claim projection, adjustment and result selection with information management capabilities to deliver the insurance industry's leading reserving platform

Built on more than a two decades of development and innovation, ResQ combines state-of-the-art modeling and reserving methods with flexible mechanisms to structure, access and manage data sets. It is available in Professional and Enterprise editions with the option of stochastic functionality.

ResQ is the first-choice reserving solution supporting powerful best practice approaches and scaling from single-user deployments to distributed reserving teams.

What ResQ can do for you

ResQ offers an integrated solution that combines powerful reserving and data management to deliver efficient team-based reserving with enforced consistency across a project.

This software reduces the opportunity for human error through the use of automation and management of aggregation calculations across projects. In addition, a comprehensive programming interface can be used to embed ResQ in wider data systems and automate complex tasks.

Key advantages of ResQ over spreadsheet-based reserving systems include:

- Multi-user system allows users to create totals across all classes or compare patterns or models in different classes
- Security allows a user to lock down data or models, a key requirement of regulation, such as Sarbanes-Oxely, Solvency II or IFRS 17
- An audit trail is created automatically
- Ease of use and speed simplifies reserving functions and techniques, such as bootstrapping, that are difficult to run in a spreadsheet format
- Superior data handling tailored for reserving tasks
- Periodically updated functionality for the requirements of Solvency II and IFRS
- Simple rolling forward of previous analyses

Expand your capability

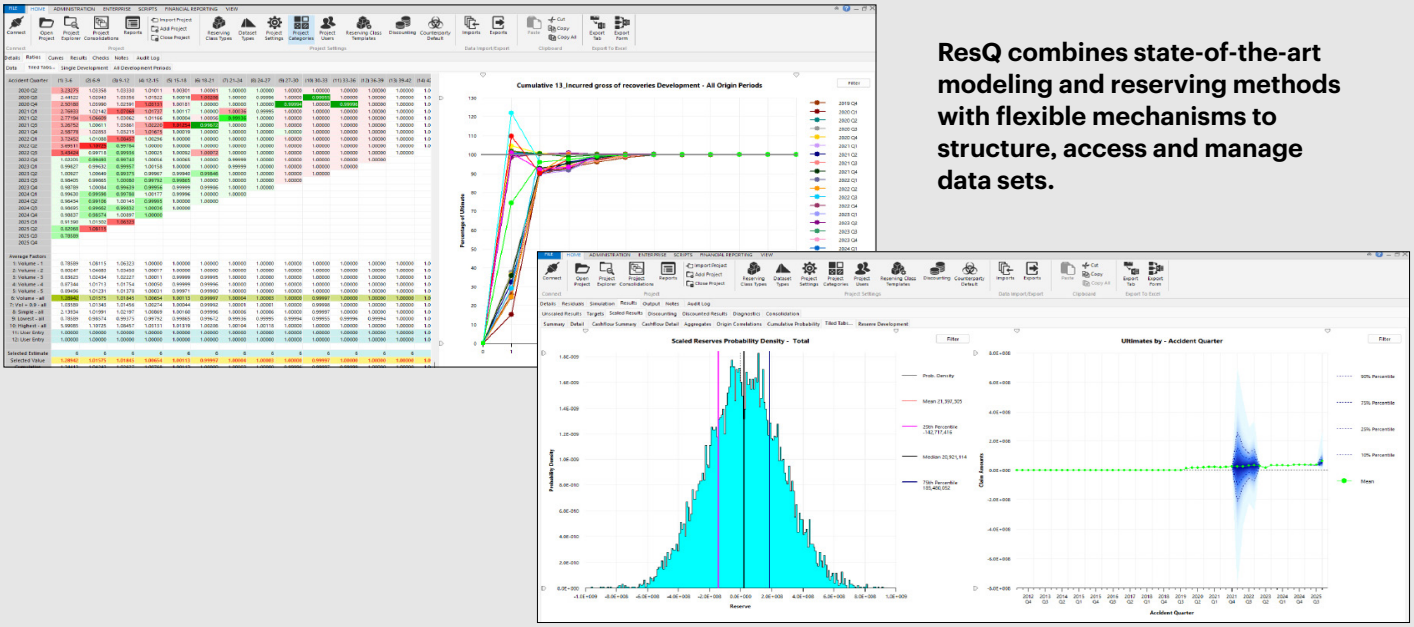

Companies can expand reserving capabilities exponentially by adding ResQ stochastic functionality or upgrading to ResQ Enterprise.

ResQ Stochastic includes a powerful method for estimating reserve variability based on leading-edge stochastic techniques. This method produces full probability distributions of possible reserve values, an increasingly important industry requirement given the spread of risk-based regulation.

ResQ Enterprise takes Sarbanes-Oxley support for the reserving process even further while addressing the demands of larger companies. Features include Microsoft SQL Server-based storage, additional data security with facilities to lock down components of a project after review, and an enhanced audit log.

"ResQ gives us the flexibility to approach reserving in the way we want. We can blend our own suite of macros with the data handling, graphics tools and Excel linkage in the main package. We are thus empowered to produce excellent reserving work at lightning speeds."

ResQ user

ResQ combines state-of-the-art modeling and reserving methods with flexible mechanisms to structure, access and manage data sets.

ResQ is a market-leading loss reserving system that combines robust modeling and data management

Key features

Modeling and calculation

- Wide selection of projection methods and diagnostics
- Adjustment methods
- Result selection/combination
- Custom calculations
- Intuitive user interface with powerful graphics

Data management

- All reserving project information stored in a single high-integrity database with enforced project consistency
- High degree of control over user access and permissions
- Intuitive project explorer/editor/flow diagram
- Flexible data views

Tools and automation

- Roll-forward wizard
- Data import and export wizard
- Management of aggregation calculations across a project
- COM programming interface supporting embedding and automation, with example reporting and consolidation utilities
- Excel add-in
- Integrated Reporting functionality

Reserving methods supported include:

- Development Factor (chain ladder)
- Bornhuetter-Ferguson including Initial Expected Loss trending
- Generalized Cape Cod
- Results selection and combination
- Cash flow projection
- Average cost per claim (Fisher-Lange and payments per claim finalized)
- Berquist-Sherman (settlement rate adjustment and case reserve adequacy adjustment)
- Payments per claim incurred
- General Linearized Models* (GLM) and Markov Chain Monte Carlo for the GLM*
- Bootstrapping*, Practical Stochastic*, Stochastic Result Selection* and Stochastic Consolidation*
- Bespoke calculations defined within ResQ or interfaced to ResQ through its COM API

ResQ Professional edition

- Powerful modeling and reserving methods
- Flexible high-integrity data management and systems integration

ResQ Enterprise edition

- Powerful security environment
- Audit log of user actions
- Enterprise-class database support

ResQ Stochastic features

- Full distributions of outstanding liabilities to help understand uncertainty in reserves

*Optional

Key Risk Warnings

This section contains important regulatory disclosures and risk warnings that are relevant to the content of this document. You should read this section carefully, as it is intended to inform and protect you.

- Towers Watson Limited (trading as WTW) and Willis Towers Watson Investments GmbH have approved this marketing material for issue to recipients
  in the UK and Germany respectively, who are categorized as Professional Clients only.
- The value of all investments and the income from them can go down as well as up. This means you could get back less than you invested.
- Changes in exchange rates may cause the value of investments to decrease or increase.
- Past performance is not a reliable indicator of future returns.
- The document contains figures that refer to simulated past performance, which is not a reliable indicator of future returns.
- Expected performance is not a reliable indicator of future returns.
- Tax treatment depends on the individual circumstances of each investor and may be subject to change in the future.
- Private markets refer to investments not traded on a public exchange or market.
- Investors should regard an investment in private markets as a long-term investment which carries higher risk than many other forms of investment.
- There is usually less transparency in place around the management of private markets investments given the lower disclosure requirements. In general, there is limited information available on the investments and performance of the underlying portfolio companies and assets, other than annual or semi-annual financial statements, or sometimes, quarterly reports.
- Such investments are more difficult to value given that they are not traded on a public exchange or market.

Regulatory Status Disclosure

Towers Watson Limited (trading as WTW) is authorized and regulated in the United Kingdom by the Financial Conduct Authority (FCA Register Firm Reference Number 432886, refer to the FCA register for further details) and incorporated in England and Wales with Company Number 05379716. Willis Towers Watson Investments GmbH (Office: Ulmenstraße 30, 65325 Frankfurt) is authorized and regulated in Germany by the German Financial Supervision Authority (BaFin – Bundesanstalt für Finanzdienstleistungsaufsicht) and incorporated in Germany with Company Number HRB 54178, registered in Frankfurt/Main. LEI 875500ZEA057SAXDQ134.

Disclaimer

Towers Watson Limited (trading as WTW) is authorized and regulated by the Financial Conduct Authority in the UK.

About Insurance Consulting and Technology

WTW's Insurance Consulting and Technology business serves the insurance industry with a powerful combination of advisory services and leading-edge technology. Our mission is to innovate and transform insurance, and we deliver solutions that help clients better select, finance, and manage risk and capital.

We work with clients of all sizes globally, including most of the world's leading insurance groups. Over 1,000 client companies use our specialist insurance software on six continents. With over 1,700 colleagues in 35 markets, we continually strive to be a partner and employer of choice to the insurance industry.

About WTW

At WTW (NASDAQ: WTW), we provide data-driven, insight-led solutions in the areas of people, risk and capital. Leveraging the global view and local expertise of our colleagues serving 140 countries and markets, we help you sharpen your strategy, enhance organizational resilience, motivate your workforce and maximize performance. Working shoulder to shoulder with you, we uncover opportunities for sustainable success — and provide perspective that moves you. Learn more at wtwco.com.
